

Your Levy at Work

Farm Business Management Dairy Farm Business Analysis — Tocal 3 days

This course assists farmers and their advisers to better monitor, analyse and understand farm business performance. It uses DairyBase and covers the importance of getting annual farm physical and financial numbers right,

Program

Foundational knowledge

Provides an understanding of farm performance and business management principles including:

- farm business performance measures
- principles of a well-balanced dairy business
- roles of different performance measures and tools
- Calculating Cost of Production and True Profit (EBIT)

Using DairyBase—farm case study

- preparing for a farm business analysis
- entering data into DairyBase
- getting your numbers right

Farm business performance

Interpret results from DairyBase to understand what they might indicate about your business including:

- compare your farm performance over multiple years or with industry data.
- interpret results from DairyBase and understand what they might indicate about your business.

Attendance will entitle you to one on one support in getting your data into DairyBase or another follow up activity you identify as a result of your participation.

Presented by Matt Harms (OnFarm Consulting) with Sheena Carter (NSW DPI)

Tocal College

Dairy Training Centre (building near the dairy)
