

PASTURE DISCUSSION GROUP

Drought Management Discussion Day and NSW Business Performance in the 2018/2019 financial year

Join us for a great day of presentation and discussion around drought related farm management, led by leading industry professionals.

Kerry Kempton (NSW DPI) will provide a review of the NSW Dairy Farm Monitor Project, focusing on farms that did well during the year that was 2018/2019. How did they do it, what decisions were made throughout the year and how did this reflect on the performance of the business as a whole?

Neil Moss from Scibus will then present on dealing with the drought, and how this impacts on farm business management, before leading the group in discussion.

Topics of discussion may include:

- Current feed markets, costs and availability
- Alternative feed options
- Feed budgets
- Safe rations with minimal forage
- How to best utilise eventual rain
- Herd management under drought conditions
